EDUCATION

2024 - PRESENT
TKM COLLEGE OF ENGINEERING

- Pursuing B-Tech in CS-Artificial intelligence.

TECHNICAL SKILLS

- **Languages:** Java, Python, JavaScript, TypeScript, Solidity, C, C++.
- **Backend & Frameworks:** Spring Boot, FastAPI, Node.js, Next.js.
- **AI & ML:** XGBoost, Scikit-Learn, Sentence-Transformers, TensorFlow, ONNX Runtime.
- **Frontend & UI: React,** JavaFX, Tailwind CSS,
- **Databases & Tools:** MongoDB, PostgreSQL, H2, Git, Google Cloud Platform (GCP).
- **Web3:** Smart Contract Development (Solidity), Ethers.js.

EXPERIENCE

- **Program Coordinator | CSI TKMCE:** Organized technical workshops and managed event logistics for 200+ members.
- **Community Manager | GDG:** Led developer outreach and engagement initiatives to foster a collaborative ecosystem.

PROJECTS

MindScribe - AI Journaling

- Built a Spring Boot/JavaFX app with async CompletableFuture logic for a non-blocking UI.
- Integrated ONNX and HuggingFace for real-time emotional insights and wellness tips.
- Engineered a smart fail-safe that ensures 100% UI responsiveness during offline states.

Game of Life - Web3 Strategy

- Deployed a Solidity smart contract to manage decentralized game state on-chain.
- Developed a Next.js/TypeScript frontend with seamless Web3 wallet integration.
- Implemented Google Genkit AI to provide dynamic, automated gameplay feedback.

Hybrid Log Classifier - ML System

- Built a tiered engine using Regex and BERT for flexible system log categorization.
- Deployed a FastAPI server to process bulk CSV logs and return real-time labels.
- Optimized inference using Scikit-Learn and persisted models via joblib.

IPL Predictor - Data Science

- Developed an XGBoost model to predict match outcomes and player auction values.
- Built an automated Pandas pipeline and deployed the tool via a Streamlit interface.

ACHIEVEMENTS & CERTIFICATIONS

- NPTEL Certification: Discrete Mathematics
- NPTEL Certification: The Joy of Computing using Python
- Workshop : CloudX Devops - Celestra'25 IEI TKMCE
